REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicants' arguments on McKenty (6,088,675) and Maslow (6,538,673) regarding the feature of receiving a user request for a description of cursor position in an electronic document parsed into a parsed tree and the feature of using an algorithm to construct a position response by walking up the parse tree, from the tree node to the root of the electronic document for providing a description of current position in the electronic document, are persuasive. Accordingly, the rejections are withdrawn.

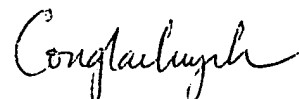

In update search, a close reference, Rao (6,300,957) was found, which discloses locating the starting element by walking up to the root element of the node-link structure, to obtain identifiers of elements on the path from the starting element to the root element. However, said locating is for mapping a node-link structure to a rendering space, not for responding to a user request for a current position in a document.

Therefore, the above features of the invention were not disclosed by the prior art of record, and would not have been obvious to a person of ordinary skill at the time of the invention in view of the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
